

Recommended handling of AMACO clichés

The clichés are made of photopolymer and are specific for the use with AMACO flexographic printers and AMACO ink. Please consider the following instructions for the storage and handling.

Storage

- dark (clichés are sensitive to ozone and UV rays)
- with top surface (text) face down and evenly stretched out
- if you stack up the clichés please separate by i.e. PE-foam layers
- at room temperature
- try to keep cliché in dust free area
- clean clichés with INK-EX before storing it for long term

Handling

- do not bend or roll
- do not touch the print surface with fingers (grease marks) - use gloves

Maintenance

- Clean regularly with INK-EX or a non fluffy cloth drenched with some AMACO thinner to remove ink residues and dust. Dry the cliché after cleaning.
- If you use cliché spray for additional fixation never spray on the backside of the cliché iron paper, but on the magnetic part of the print plate.
